

Nested ifs

| Logical Operators | |
|-------------------|--|
| | |
| Operator | What does it mean? How do you use it? |
| && | The logical AND operator is used to check if 2 or more conditions are satisfied at the same time, if yes then the condition becomes true |
| | The logical OR operator is used to check if either one of more than many conditions are satisfied at the same time, if yes then the condition becomes true |
| ! | The logical NOT operator is used to reverse a logical state of a condition. |
